This comprehensive text is the first to define and address the broad spectrum of acute and chronic internal medicine disorders that occur in cancer patients and cancer survivors as side-effects of the disease itself, or from treatment regimens.

Recent therapeutic advances in cancer treatment indicate that rather than a killer, cancer is becoming a chronic disease. The authors cover non-oncologic aspects of internal medicine such as anorexia, obesity, bone loss, diabetes, depression, pain, fatigue, congestive heart failure, skin disorders, and pneumonia. This book is conceived as a companion to standard internal medicine and oncology texts a comprehensive reference resource for internists caring for cancer patients and oncologists in practice. The text is extensively indexed for easy access and retrieval of information.

Publication Year: 2009
Edition: 1st
Author/Editor: Yeung, Sai-Ching Jim; Escalante, Carmen P.; Gagel, Robert F.
Publisher: People's Medical Publishing House--USA LTD
ISBN: 978-1-607-95008-0
Doody's Star Rating®: ★★★★★ Score: 100
Platform: OvidMD, Ovid
Product Type: Book
Speciality: Oncology
Language: English
Pages: 772
Illustrations: 0
Included In: PMPH USA All Books Collection 2013, PMPH USA Doody’s Premier Titles Collection 2014
