The "Guide" serves as a valuable resource for orienting nurses new to ambulatory care as well as developing comprehensive competency assessment programs.

A wide selection of age specific and specialty care topics are covered, including telehealth. The guide contains
1. Chapters on nurse educator competencies, defining the educator's role in ambulatory care and providing guidance and tools for use in developing needed competency.
2. A tool kit for transitioning to ambulatory care with many helpful links and resources.
3. An appendix containing sample orientation and competency tools that will help you develop your own tools to orient or evaluate your staff.
