Lymphoid Malignancies is a visual presentation of most haematological malignancies compiled by leading experts in the UK.

Meeting the needs for haematologists and clinical chemists for an up-to-date reference, this atlas provides a visual presentation of lymphoproliferative disorders, leukaemia and plasma cell neoplasms. Each malignancy is surveyed based on molecular and cellular changes, including histochemistry, cytochemistry and relevant radiographs. Pertinent clinical information relating to clinical presentation, differential diagnosis and prognostic indicators are concisely outlined, using numerous graphics and citing key references in the field.

Benefits:
* Provides the most up-to-date reference of its type in the field of haematology
* Assists visual investigation of signs and symptoms
* Ready-to-use information in an easily accessible format
