A full-color reference on general dermatology for chiropractors and chiropractic students

Chiropractors see more skin than any other primary health provider, and have a perfect opportunity to make early diagnoses of serious skin conditions, such as malignant melanoma. In order to provide comprehensive patient care, chiropractic physicians must have a solid foundation of dermatology.

With over 200 full-color photos and illustrations this book is a valuable resource for understanding the natural and complementary treatments available for many common skin disorders. Including a completely cross-referenced listing of conditions and treatments, this text is an ideal source of relevant dermatological information for chiropractic college dermatology instructors, chiropractic students, and practicing chiropractors.
