Advances in Surgical Pathology: Lung Cancer, a volume in the Advances in Surgical Pathology series, features chapters on current and impending changes in the field of lung cancer that directly affect pathologists.

Topics include:
- The 2004 updates of the WHO Classification of Tumors of the Lung;
- The ongoing new classification of neuroendocrine carcinomas of the lung by the International Association for the Study of Lung Cancer;
- The ongoing revision of the pathologic and clinical staging of lung cancer by the AJCC;
- Molecular diagnostics in the diagnosis of lung cancer;
- The role of the pathologist in the new molecular targeted therapies for lung cancer;

Other current topics discussed include:
- New understanding of the premalignant and preinvasive lesions and the controversies and revisions of the diagnosis of bronchioloalveolar carcinoma.
