As the premier resource on professional nursing practice, this new edition of an ANA classic is informed by the advances in health care and professional nursing today.

Its single scope of practice specifies the who, what, where, when, why, and how of nursing practice. Each standard of professional practice is now measurable by specific competencies that serve as evidence of compliance.

The book can help inform such nursing and healthcare work as:
* Quality improvement
* Regulations
* Reimbursement and financing methods
* Organizational structures
* Certification and credentialing
* Position descriptions and performance appraisals
* Classroom teaching and in-service training
