This unique volume presents the cutting edge of haemostasis in surgery and includes the advances in the science pertaining to related important medical and surgical problems.

This is the only book to include all the surgical subspecialties focusing specifically on the problems of haemostasis in each field. State-of-the-art laboratory and clinical reviews are included and modern devices used in the different specialties are also covered. The contributors are well-known authorities in their special fields and haematological area. Each is covered comprehensively with special emphasis on unanswered questions. The book is addressed to all surgeons and physicians with an interest in this exciting field.
