Faith Community Nursing: Scope and Standards of Practice

Authoritative and fully updated, this publication addresses the essentials of faith community nursing, and is applicable to many faith traditions.

The 16 Standards of Faith Community Nursing Practice reflect the specialty’s professional values and priorities and provide practice directions and the framework for practice evaluation. Each standard is measurable by a set of specific competencies that serve as evidence of minimal compliance with that standard. The book’s single scope of practice specifies the who, what, where, when, why, and how of the practice that is common to and expected of all faith community nurses.

While primarily for faith community nurses and the nursing profession, it is also aimed at other healthcare providers, spiritual leaders, families, and members of faith communities.
