Preparing for the Neurology Boards, recertification, or the AAN Residency In-Service Training Exam (RITE) can be daunting years of study, training, and volumes of material to be processed, organized, and distilled for ready recall when the moment arrives. It may seem impossible to retain so much information. However, the completely revised and expanded second edition of this unique, easy-to-use bestselling review guide gives you all the tools you need to tie it all together no additional texts needed.

The book breaks down the field of neurology into 24 chapters covering all subjects on the neurology boards including child and adult psychiatry, neuropsychiatry, and neurophysiology. Using an expanded outline format and innovative heading hierarchy for in-depth or rapid review, the topics are arranged so that you will read the easiest-to-remember first and the most-likely-to-be-forgotten last.

Every chapter has been brought up-to-date to reflect current science and practice and includes information on: pivotal trials, new medications and treatments, diagnostic criteria, genetic disorders, and AAN guidelines.

Ultimate Review for the Neurology Boards is a must-have for residents preparing for boards or studying for the RITE exam, and for neurologists preparing for recertification.
