This volume in this important series addresses methodologies for the treatment of stroke and Parkinson’s disease.

Part of the Clinical Practice of Chinese Medicine series, a comprehensive series characterized by important diseases and providing detailed western disease information and Chinese clinical treatment effective for each specific disease.

The intention of this book is to introduce overseas readers to the Chinese medical experience, while offering a variety of complementary treatment methods for both stroke and Parkinson’s disease. It provides an overall understanding of Chinese diagnosis and treatment methods, as well as providing specific therapeutic approaches for patients suffering from stroke and Parkinson’s disease.
