Russell & Rubinstein's Pathology of Tumors of the Nervous System

The leading international professional reference text describing all aspects of the pathology of brain tumours - genetics, molecular biology, epidemiology, morphology, immunohistochemistry, diagnostic criteria and prognosis.

Beautifully illustrated in color throughout and comprehensively referenced, this seventh edition is a clearly organized volume, integrating basic sciences within sections devoted to individual tumor entities. Entirely revised and updated throughout by a wide range of internationally revered authorities, the content reflects the latest tumour classification and grading while neuroradiologic correlation via state of the art neuroimaging techniques continues to be emphasised in all diagnostic entities.
