Thoroughly updated and revised in line with the latest World Health Organization classification system, the second edition of Diagnostic Lymph Node Pathology continues to be an essential guide to the interpretation of lymph node biopsies for all professional and trainee general pathologists and haematopathologists alike.

Presented in full colour with numerous illustrations of exceptional quality, the new edition covers both classical and less well known features of individual disease processes together with the differential diagnoses of lymph node biopsy specimens. B-cell lymphomas have been reorganized in line with WHO guidelines whereas topics such as Epstein-Barr virus, age-related lymphomas and prognostic indicators have been expanded and new cases using needle core biopsies are presented.

* A comprehensive guide to differential diagnosis of lymph node biopsy specimens
* Fully revised in line with WHO reclassification
* Over 300 colour illustrations of the highest quality
* The layout and design means that essential information can be seen at a glance
