Biopsy Interpretation of the Central Nervous System focuses on differentiating lesions with similar histologic appearances.

Differential diagnosis based on multiple factors is emphasized to enable efficient comparison of similar entities. The concise text highlights the distinguishing histologic features of each entity, discusses the ancillary testing necessary to make a confident diagnosis, and places each lesion in the setting of its clinical significance.

More than 300 full-color photomicrographs demonstrate the diagnostic features of each entity. Lists of differential diagnoses based on other factors, such as location and typical age of occurrence, are also included.

Publication Year: 2011
Edition: 1st Ed.
Author/Editor: Schniederjan, Matthew J.; Brat, Daniel J.
Publisher: Lippincott Williams & Wilkins (LWW)
Doody's Star Rating®: ★★★ Score: 87
Platform: Ovid
Product Type: Book
Speciality: Neurology, Pathology
Language: English
Pages: 360
Illustrations: 320
Included In:
- Lippincott Williams & Wilkins Classic Book Collection 2016
- Lippincott Williams & Wilkins Neurology Book Collection
- Lippincott Williams & Wilkins Total Access Book Collection 2010 Onward
- Lippincott Williams & Wilkins Total Access Book Collection 2011-2015 Bridge
