Aids pathologists in accurately evaluating disease processes. It includes detailed chapters on interstitial lung disease, lung cancer, and neuroendocrine tumors.

Organized by traditional disease groups, this book provides a solid approach to formulating surgical and medical decisions. This text is geared toward surgical pathologists, pathology residents, pathology fellows, pulmonologists, pulmonology fellows, and thoracic surgeons, and includes the latest information on the best use of immunohistochemical markers, special stains, and molecular assays to aid in more accurate and cost-efficient diagnoses.
