Macular Surgery, second edition serves as a comprehensive and contemporary review of macular diseases and their management. An exhaustive review of the latest proven surgical techniques and therapies for treatment of macular disorders is provided, with emphasis on proven techniques from and extensive reviews of controlled clinical trials. Specific chapters of the book are devoted to age-related macular degeneration, diabetic retinopathy, macular holes, epiretinal membranes, subretinal hemorrhage, and choroidal neovascularization. An entire section is devoted to prevention of complications from macular surgery by leading experts within the field.
