Hydroecology and Ecohydrology: Past, Present and Future

Rely on Ovid as the trusted solution that transforms research into results

This state-of-the-art, research level text considers the growing volume of research at the interface of hydrology and ecology

The book considers a range of organisms (plants, invertebrates and fish), provides a long-term perspective on contemporary and palaeo-systems, and emphasizes wider research implications with respect to environmental and water resource management.

The editors and contributors are internationally recognised experts in hydrology and ecology from institutions across North America, South America, Australia, and Europe. Chapters provide a broad geographical coverage and bridge the traditional subject divide between hydrology and ecology.

The book is an indispensable resource for academics and postgraduate researchers in departments of physical geography, earth sciences, environmental science, environmental management, civil engineering, water resource management, biology, zoology, botany and ecology. It is also of interest to professionals working within environmental consultancies, organizations and national agencies

Focuses include:

Publication Year	2008
Edition	1st
Author/Editor	Wood, Paul J; Hannah, David M; and Sadler, Jonathan P.
Publisher	Wiley
ISBN	978-0-470-01017-4
Platform	Ovid
Product Type	Book
Speciality	Environmental Sciences
Language	English
Pages	460
Illustrations	0
