Designed to help jobbing histopathologists jog their memory and get through more workload in any working day.

This book is not designed to be an “exam cram” and neither will it serve as a basic text for beginners. Trainees, however, will still benefit from the sheer breadth of topics covered in this one small volume: from lab management and lab methods, to autopsy practice, cytology and all sub-specialties in surgical pathology. A chapter on exam technique and mnemonics makes the book also an essential companion for those revising for professional exams.

Rapid access is facilitated by a bullet-point, tabular and diagrammatic style, as well as by handy anatomical diagrams, guidance on the ‘Cut-Up’ with emphasis on core ‘datasets’ and by a special index for frozen section advice, grading systems and scoring systems. The book provides, where useful, differential diagnosis lists and presents diagnostically helpful molecular and immunohistochemical findings.
