With over ten thousand inter-hospital transfers of children and neonates now taking place every year in the UK, this book, and the associated training course run by the Advanced Life Support Group (ALSG) have been developed to provide an introduction to the knowledge required to undertake these transfers.

This book is aimed at healthcare professionals either beginning their training in paediatric or neonatal transport and those who are involved in undertaking such transfers on an occasional basis.

Developed by a multi-professional group from across the UK, this new title incorporates a systematic approach throughout. This approach is adapted from the adult STaR course and covers the following:

Publication Year: 2008
