A practical and comprehensive guide to the care of adolescents and young adults with cancer. This volume focuses on the impact of diagnosis and its implications on the lives of adolescents, their families, and the health professionals involved in their care. Sections address the adolescent's experience of cancer, ongoing care needs during treatment, and life after cancer, which can include rehabilitation and palliative care. The book is updated to reflect recent advances in oncology and the needs of young patients. It is a resource for healthcare professionals and will appeal to nurses, oncology nurses, allied health professionals, oncology social workers, and others involved in the care of adolescents and young adults with cancer.
