A handbook for educational supervisors everywhere, covering topics generic to graduate and undergraduate medical education, whatever the specialty.

The world of postgraduate medical education is changing, and educational supervisors need the knowledge and skills to be able to do their job effectively. Many of those who want to do this job well feel unprepared for the task.

Written by experts in their field, each chapter gives an overview of key topics in educational supervision with references and further resources. The book provides evidence and theory when applicable, but is deliberately practical, with case studies and tips for good practice as well.

Readers include:
