A handbook for educational supervisors everywhere, covering topics
generic to graduate and undergraduate medical education, whatever the
specialty

The world of postgraduate medical education is changing, and educational
supervisors need the knowledge and skills to be able to do their job effectively.
Many of those who want to do this job well feel unprepared for the task.

Written by experts in their field, each chapter gives an overview of key topics in
educational supervision with references and further resources. The book provides
evidence and theory when applicable, but is deliberately practical, with case
studies and tips for good practice as well.

Readers include:
