Eleven premium books from some of the world’s leading medical and health science publishers that have been designated as Doody’s Core Titles™ by healthcare professionals and medical librarians.

This comprehensive collection is a great way for medical libraries—especially institutions with limited budgets—to quickly expand their e-resource collection with some of the most highly regarded books in pediatrics.

Doody’s Core Titles have been selected by academically-affiliated healthcare professionals and medical librarians, and are considered must-have resources for practitioners, researchers, and students.

A Core Title is a book that represents essential knowledge needed by professionals or students in a given discipline. Up to three librarians score each title on a score of 0-3 in five fundamental collection development criteria: authoritativeness of author and publisher; scope and coverage of the subject matter; quality of content (including timeliness); usefulness and purpose; and value of money. Scores are averaged to provide an overall score for each title.

Doody’s Review Service is a leading source for expert, authoritative quality assessment and collection development tools for medical, nursing, and allied health books.
