Lippincott Williams & Wilkins Doody's Premier Star Collection 2018

This collection offers cost-effective, perpetual access to over 160 medical and health science books from Lippincott Williams & Wilkins that have received a 4 or 5 star rating from Doody's Review Services. These titles are not included in the Doody's Core Collection and would be a great stand-alone addition or a companion to the Core or Essential collections.

Books included in the collection span a wide variety of disciplines - from anesthesiology to nursing to surgery. And all have been published since 2011, giving readers the most up-to-date information on breakthroughs and advances in their field.

Doody's Review Service is a leading source for expert, authoritative quality assessment and collection development tools for medical, nursing, and allied health books. Star ratings are on a 0-5 scale, and a 4 or 5 star rating indicates a book of the highest quality for any medical institution. Ratings are provided in each specialty and are made by librarians who select and score in that specialty. Librarians work independently of one another, making selections based on their experience with their respective institutions.

Publisher
Lippincott Williams & Wilkins (LWW)
