One-click access to more than 100 books covering numerous animal types and relevant issues.

CABI is one of the world's leading sources of full-text scholarly literature in agriculture, public health, and food and environmental sciences.

The CABI Animal & Veterinary Science Book Collection is comprised of more than 100 books covering numerous animal types—from mammals to insects to amphibians—as well as important issues surrounding the production and care of livestock.

This collection is updated continuously as additional books become available.

Titles included:

Agricultural Biotechnology and Intellectual Property Protection
Agriculture, Hydrology and Water Quality
Amino Acids in Animal Nutrition
Animal Abuse: Helping Animals and People
Animal Domestication and Behaviour
Animal Health and Welfare in Organic Agriculture
Applied Animal Endocrinology
Aquaculture and Fisheries Biotechnology
Aquaculture and Fisheries Biotechnology; Genetic Approaches, 2nd Edition
Aquatic Insects: Challenges to Populations
Areawide Pest Management: Theory and Implementation
Avian Gut Function, Health and Diseases
Bacteria from Fish and Other Aquatic Animals
Bioassays of Entomopathogenic Microbes and Nematodes
Biological Control Programmes in Canada, 1981-2001
Biology of Breeding Poultry. Poultry Science Symposium Series, No. 29
Biostatistics for Animal Science
Breeding for Disease Resistance in Farm Animals, 3rd Edition
Camel Meat and Meat Products
China's Livestock Revolution
Crocodiles
Crop Pollination by Bees
Dairy Goats Feeding and Nutrition
Dairy Herd Health
Dairy Sheep Nutrition
Deafness in Cats and Dogs
Dietary Supplements for the Health and Quality of Cultured Fish
Digestive Physiology of Pigs
Diseases and Disorders of Finfish in Cage Culture
Dogs, Zoonoses and Public Health
Dogs, Zoonoses and Public Health
Domestic Duck Production: Science and Production
Ecologically-based Integrated Pest Management
Entomopathogenic Nematology
Environmental Policies for Agricultural Pollution Control
Environmental Risk Assessment of Genetically Modified Organisms, Volume 3.
Methodologies for Transgenic Fish
Enzymes in Farm Animal Nutrition
Enzymes in Farm Animal Nutrition, 2nd Edition
Evaluating Indirect Ecological Effects of Biological Control
External Parasites of Small Ruminants
Farm Animal Medicine and Surgery for Small Animal Veterinarians
Farm Animal Metabolism and Nutrition
Feeding in Domestic Vertebrates From Structure to Behaviour
Field and Laboratory Methods for Grassland and Animal Production Research
Finfish Aquaculture Diversification
Fish Diseases and Disorders Volume 3, Second Edition: Viral, Bacterial and Fungal Infections
Fish Diseases and Disorders, Vol. 2, 2nd Edition
Fish Diseases and Disorders, Volume 1, 2nd edition: Protozoan and Metazoan Infections
Fish Parasites. Pathobiology and Protection
Fisheries Co-management
Fluorides in the Environment
Forage Evaluation in Ruminant Nutrition
Freshwater Nematodes
GIS and Spatial Analysis in Veterinary Science
Goat Meat Production and Quality
Grassland Ecophysiology and Grazing Ecology
Grazing Ecology and Forest History
Greenhouse Gas Sinks
Growth of Farm Animals
Hemp Diseases and Pests
Hormonal Regulation of Farm Animal Growth
Human-Livestock Interactions, 2nd Edition. The Stockperson and the Productivity and Welfare of Intensively Farmed Animals
Industrial Crops and Uses
Insect Conservation Biology
Insect Evolutionary Ecology
Insect Movement
Insect Pathogens: Molecular Approaches and Techniques
Insects on Palms
Integrated Food Safety and Veterinary Public Health
Intellectual Property Rights in Animal Breeding and Genetics
Invasive Alien Species
Invertebrates as Webmasters in Ecosystems
Laboratory Production of Cattle Embryos
Linear Models for the Prediction of Animal Breeding Values
Livestock Handling and Transport
