One-click access to more than 100 books covering numerous animal types and relevant issues.

CABI is one of the world’s leading sources of full-text scholarly literature in agriculture, public health, and food and environmental sciences.

The CABI Animal & Veterinary Science Book Collection is comprised of more than 100 books covering numerous animal types—from mammals to insects to amphibians—as well as important issues surrounding the production and care of livestock.

This collection is updated continuously as additional books become available.

Titles included:

- Agricultural Biotechnology and Intellectual Property Protection
- Agriculture, Hydrology and Water Quality
- Amino Acids in Animal Nutrition
- Animal Abuse: Helping Animals and People
- Animal Domestication and Behaviour
- Animal Health and Welfare in Organic Agriculture
- Applied Animal Endocrinology
- Aquaculture and Fisheries Biotechnology
- Aquaculture and Fisheries Biotechnology; Genetic Approaches, 2nd Edition
- Aquatic Insects: Challenges to Populations
- Areawide Pest Management: Theory and Implementation
- Avian Gut Function, Health and Diseases
- Bacteria from Fish and Other Aquatic Animals
- Bioassays of Entomopathogenic Microbes and Nematodes
- Biological Control Programmes in Canada, 1981-2001
- Biology of Breeding Poultry. Poultry Science Symposium Series, No. 29
- Biorational Tree-Fruit Pest Management
- Biostatistics for Animal Science
- Breeding for Disease Resistance in Farm Animals, 3rd Edition
- Camel Meat and Meat Products
- China’s Livestock Revolution
- Crocodiles
- Crop Pollination by Bees
- Dairy Goats Feeding and Nutrition
- Dairy Herd Health
- Dairy Sheep Nutrition
- Deafness in Cats and Dogs
- Dietary Supplements for the Health and Quality of Cultured Fish
- Digestive Physiology of Pigs
- Diseases and Disorders of Finfish in Cage Culture
- Dogs, Zoonoses and Public Health
- Dogs, Zoonoses and Public Health
Radar Entomology: Observing Insect Flight and Migration
Redesigning Animal Agriculture: The Challenge of the 21st Century
Reproductive Technologies in Farm Animals
Resource Allocation Theory Applied to Farm Animal Production
Responsible Marine Aquaculture
Root Feeders: An Ecosystem Approach
Ruminant Physiology
Salmonella in Domestic Animals
Sheep Nutrition
Small-Scale Fisheries Management: Frameworks and Approaches for the Developing World
Social Behaviour in Farm Animals
Stereotypic Animal Behaviour, 2nd Edition
Sustainable Livestock Management for Poverty Alleviation and Food Security
Taenia Solium Cysticeriosis
The Behavioural Biology of Dogs
The Behavioural Ecology of Parasites
The Biology of Animal Stress
The Biology of Mosquitoes Volume 3: Transmissions of Viruses and Interactions with Bacteria
The Biology of Terrestrial Molluscs
The Biology of Wetas, King Crickets and Their Allies
The Economics of Animal Health and Production
The Economics of Livestock Disease Insurance: Concepts, Issues and International Case Studies
The Ecosystem Approach to Fisheries
The Encyclopedia of Farm Animal Nutrition
The Ethology of Domestic Animals
The Genetics of the Dog
The Genetics of the Horse
The Genetics of the Pig, 2nd Edition
The Mineral Nutrition of Livestock, 3rd Edition
The Oestrid Flies: Biology, Host-Parasite Relationships, Impact and Management
The Regulation of Agricultural Biotechnology
The Trypanosomiases
The Weaner Pig
Ticks and Tick-borne Diseases: Geographical Distribution and Control Strategies in the Euro-Asia Region
Tilapia Culture
Toxocara: The Enigmatic Parasite
Tropical Deltas and Coastal Zones
Tylenchida
Urban Aquaculture
Urban Pest Management: An Environmental Perspective
Veterinary Treatment for Working Equines
Veterinary Treatment of Llamas and Alpacas
Veterinary Treatment of Sheep and Goats
Voluntary Food Intake and Diet Selection in Farm Animals. Second Edition
Welfare of the Laying Hen
