One-click access to more than 100 books covering numerous animal types and relevant issues.

CABI is one of the world’s leading sources of full-text scholarly literature in agriculture, public health, and food and environmental sciences.

The CABI Animal & Veterinary Science Book Collection is comprised of more than 100 books covering numerous animal types—from mammals to insects to amphibians—as well as important issues surrounding the production and care of livestock.

This collection is updated continuously as additional books become available.

Titles included:

Agricultural Biotechnology and Intellectual Property Protection
Agriculture, Hydrology and Water Quality
Amino Acids in Animal Nutrition
Animal Abuse: Helping Animals and People
Animal Domestication and Behaviour
Animal Health and Welfare in Organic Agriculture
Applied Animal Endocrinology
Aquaculture and Fisheries Biotechnology
Aquaculture and Fisheries Biotechnology; Genetic Approaches, 2nd Edition
Aquatic Insects: Challenges to Populations
Areawide Pest Management: Theory and Implementation
Avian Gut Function, Health and Diseases
Bacteria from Fish and Other Aquatic Animals
Bioassays of Entomopathogenic Microbes and Nematodes
Biological Control Programmes in Canada, 1981-2001
Biology of Breeding Poultry. Poultry Science Symposium Series, No. 29
Biorational Tree-Fruit Pest Management
Biostatistics for Animal Science
Breeding for Disease Resistance in Farm Animals, 3rd Edition
Camel Meat and Meat Products
China’s Livestock Revolution
Crocodiles
Crop Pollination by Bees
Dairy Goats Feeding and Nutrition
Dairy Herd Health
Dairy Sheep Nutrition
Deafness in Cats and Dogs
Dietary Supplements for the Health and Quality of Cultured Fish
Digestive Physiology of Pigs
Diseases and Disorders of Finfish in Cage Culture
Dogs, Zoonoses and Public Health
Dogs, Zoonoses and Public Health
Radar Entomology: Observing Insect Flight and Migration
Redesigning Animal Agriculture: The Challenge of the 21st Century
Reproductive Technologies in Farm Animals
Resource Allocation Theory Applied to Farm Animal Production
Responsible Marine Aquaculture
Root Feeders: An Ecosystem Approach
Ruminant Physiology
Salmonella in Domestic Animals
Sheep Nutrition
Small-Scale Fisheries Management: Frameworks and Approaches for the Developing World
Social Behaviour in Farm Animals
Stereotypic Animal Behaviour, 2nd Edition
Sustainable Livestock Management for Poverty Alleviation and Food Security
Taenia Solium Cysticercosis
The Behavioural Biology of Dogs
The Behavioural Ecology of Parasites
The Biology of Animal Stress
The Biology of Mosquitoes Volume 3: Transmissions of Viruses and Interactions with Bacteria
The Biology of Terrestrial Molluscs
The Biology of Wetas, King Crickets and Their Allies
The Economics of Animal Health and Production
The Economics of Livestock Disease Insurance: Concepts, Issues and International Case Studies
The Ecosystem Approach to Fisheries
The Encyclopedia of Farm Animal Nutrition
The Ethology of Domestic Animals
The Genetics of the Dog
The Genetics of the Horse
The Genetics of the Pig, 2nd Edition
The Mineral Nutrition of Livestock, 3rd Edition
The Oestrid Flies: Biology, Host-Parasite Relationships, Impact and Management
The Regulation of Agricultural Biotechnology
The Trypanosomiases
The Weaner Pig
Ticks and Tick-borne Diseases: Geographical Distribution and Control Strategies in the Euro-Asia Region
Tilapia Culture
Toxocara: The Enigmatic Parasite
Tropical Deltas and Coastal Zones
Tylenchida
Urban Aquaculture
Urban Pest Management: An Environmental Perspective
Veterinary Treatment for Working Equines
Veterinary Treatment of Llamas and Alpacas
Veterinary Treatment of Sheep and Goats
Voluntary Food Intake and Diet Selection in Farm Animals, Second Edition
Welfare of the Laying Hen
