One-click access to more than 100 books covering numerous animal types and relevant issues.

CABI is one of the world's leading sources of full-text scholarly literature in agriculture, public health, and food and environmental sciences.

The CABI Animal & Veterinary Science Book Collection is comprised of more than 100 books covering numerous animal types—from mammals to insects to amphibians—as well as important issues surrounding the production and care of livestock.

This collection is updated continuously as additional books become available.

Titles included:

Agricultural Biotechnology and Intellectual Property Protection
Agriculture, Hydrology and Water Quality
Amino Acids in Animal Nutrition
Animal Abuse: Helping Animals and People
Animal Domestication and Behaviour
Animal Health and Welfare in Organic Agriculture
Applied Animal Endocrinology
Aquaculture and Fisheries Biotechnology
 Aquaculture and Fisheries Biotechnology; Genetic Approaches, 2nd Edition
Aquatic Insects: Challenges to Populations
Areawide Pest Management: Theory and Implementation
Avian Gut Function, Health and Diseases
Bacteria from Fish and Other Aquatic Animals
Bioassays of Entomopathogenic Microbes and Nematodes
Biological Control Programmes in Canada, 1981-2001
Biology of Breeding Poultry. Poultry Science Symposium Series, No. 29
Biorational Tree-Fruit Pest Management
Biostatistics for Animal Science
Breeding for Disease Resistance in Farm Animals, 3rd Edition
Camel Meat and Meat Products
China's Livestock Revolution
Crocodiles
Crop Pollination by Bees
Dairy Goats Feeding and Nutrition
Dairy Herd Health
Dairy Sheep Nutrition
Deafness in Cats and Dogs
Dietary Supplements for the Health and Quality of Cultured Fish
Digestive Physiology of Pigs
Diseases and Disorders of Finfish in Cage Culture
Dogs, Zoonoses and Public Health
Dogs, Zoonoses and Public Health
Domestic Duck Production: Science and Production
Ecologically-based Integrated Pest Management
Entomopathogenic Nematology
Environmental Policies for Agricultural Pollution Control
Environmental Risk Assessment of Genetically Modified Organisms, Volume 3.
Methodologies for Transgenic Fish
Enzymes in Farm Animal Nutrition
Enzymes in Farm Animal Nutrition, 2nd Edition
Evaluating Indirect Ecological Effects of Biological Control
External Parasites of Small Ruminants
Farm Animal Medicine and Surgery for Small Animal Veterinarians
Farm Animal Metabolism and Nutrition
Feeding in Domestic Vertebrates From Structure to Behaviour
Field and Laboratory Methods for Grassland and Animal Production Research
Finfish Aquaculture Diversification
Fish Diseases and Disorders Volume 3, Second Edition: Viral, Bacterial and Fungal Infections
Fish Diseases and Disorders, Vol. 2, 2nd Edition
Fish Diseases and Disorders, Volume 1, 2nd edition: Protozoan and Metazoan Infections
Fish Parasites, Pathobiology and Protection
Fisheries Co-management
Fluorides in the Environment
Forage Evaluation in Ruminant Nutrition
Freshwater Nematodes
GIS and Spatial Analysis in Veterinary Science
Goat Meat Production and Quality
Grassland Ecophysiology and Grazing Ecology
Grazing Ecology and Forest History
Greenhouse Gas Sinks
Growth of Farm Animals
Hemp Diseases and Pests
Hormonal Regulation of Farm Animal Growth
Human-Livestock Interactions, 2nd Edition. The Stockperson and the Productivity and Welfare of Intensively Farmed Animals
Industrial Crops and Uses
Insect Conservation Biology
Insect Evolutionary Ecology
Insect Movement
Insect Pathogens: Molecular Approaches and Techniques
Insects on Palms
Integrated Food Safety and Veterinary Public Health
Intellectual Property Rights in Animal Breeding and Genetics
Invasive Alien Species
Invertebrates as Webmasters in Ecosystems
Laboratory Production of Cattle Embryos
Linear Models for the Prediction of Animal Breeding Values
Livestock Handling and Transport
Livestock Handling and Transport, 3rd Edition
Long Distance Transport and Welfare of Farm Animals
Lyme Borreliosis
Macrocyclic Lactones in Antiparasitic Therapy
Mammalian Genomics
Mastitis Control in Dairy Herds, 2nd Edition
Mathematical Modelling in Animal Nutrition
Measuring and Auditing Broiler Welfare
Meat Science: An Introductory Text
Mechanistic Modelling in Pig and Poultry Production
Methods in Agricultural Chemical Analysis
Mineral Nutrition of Livestock, 4th Edition
Modelling Nutrient Utilization in Farm Animals
Molecular and Physiological Basis of Nematode Survival
Muscle Development of Livestock Animals
Mycoplasma Diseases of Ruminants
Mycotoxins: Detection Methods, Management, Public Health and Agricultural Trade
Nematode Behaviour
Nematode Parasites of Vertebrates
Nematodes as Environmental Indicators
Nematology: advances and perspectives. Volume 2: Nematode management and utilization
Nitrogen and Phosphorus Nutrition of Cattle
Nutrient Digestion and Utilization in Farm Animals
Nutrient Elements in Grassland
Nutrient Requirements and Feeding of Finfish for Aquaculture
Nutrition and Feeding of Organic Cattle
Nutrition and Feeding of Organic Pigs
Nutrition and Feeding of Organic Poultry
Nutrition of the Rabbit, 2nd Edition
Parasitic Flatworms: Molecular Biology, Biochemistry, Immunology and Physiology
Parasitic Nematodes
Paratuberculosis: Organism, Disease, Control
Pest Management and Phytosanitary Trade Barriers
Phosphorus and Calcium Utilization and Requirements in Farm Animals
Poisoning by Plants, Mycotoxins and Related Toxins
Poisonous Plants and Related Toxins
Poultry Feedstuffs
Poultry Genetics, Breeding and Biotechnology
Poultry Production in Hot Climates, 2nd Edition
Prioritizing Agricultural Research for Development: Experiences and Lessons
Protein Turnover
Protozoal Abortion in Farm Ruminants
Public Concerns, Environmental Standards and Agricultural Trade
Quality Control and Production of Biological Control Agents
Quantitative Aspects of Ruminant Digestion and Metabolism
Quantitative Genetics, Genomics and Plant Breeding
Quantitative Trait Loci Analysis in Animals
Rabbit Production
Radar Entomology: Observing Insect Flight and Migration
Redesigning Animal Agriculture. The Challenge of the 21st Century
Reproductive Technologies in Farm Animals
Resource Allocation Theory Applied to Farm Animal Production
Responsible Marine Aquaculture
Root Feeders: An Ecosystem Approach
Ruminant Physiology
Salmonella in Domestic Animals
Sheep Nutrition
Small-Scale Fisheries Management. Frameworks and Approaches for the Developing World.
Social Behaviour in Farm Animals
Stereotypic Animal Behaviour, 2nd Edition
Sustainable Livestock Management for Poverty Alleviation and Food Security
Taenia Solium Cysticerosis
The Behavioural Biology of Dogs
The Behavioural Ecology of Parasites
The Biology of Animal Stress
The Biology of Mosquitoes Volume 3: Transmissions of Viruses and Interactions with Bacteria
The Biology of Terrestrial Molluscs
The Biology of Wetas, King Crickets and Their Allies
The Economics of Animal Health and Production
The Economics of Livestock Disease Insurance: Concepts, Issues and International Case Studies
The Ecosystem Approach to Fisheries
The Encyclopedia of Farm Animal Nutrition
The Ethology of Domestic Animals
The Genetics of the Dog
The Genetics of the Horse
The Genetics of the Pig, 2nd Edition
The Mineral Nutrition of Livestock, 3rd Edition
The Oestrid Flies: Biology, Host-Parasite Relationships, Impact and Management
The Regulation of Agricultural Biotechnology
The Trypanosomiases
The Weaner Pig
Ticks and Tick-borne Diseases: Geographical Distribution and Control Strategies in the Euro-Asia Region
Tilapia Culture
Toxocara: The Enigmatic Parasite
Tropical Deltas and Coastal Zones
Tylenchida
Urban Aquaculture
Urban Pest Management. An Environmental Perspective
Veterinary Treatment for Working Equines
Veterinary Treatment of Llamas and Alpacas
Veterinary Treatment of Sheep and Goats
Voluntary Food Intake and Diet Selection in Farm Animals. Second Edition
Welfare of the Laying Hen
Publisher: CABI Publishing
Platform: Ovid
