One-click access to more than 100 books covering numerous animal types and relevant issues.

CABI is one of the world's leading sources of full-text scholarly literature in agriculture, public health, and food and environmental sciences.

The CABI Animal & Veterinary Science Book Collection is comprised of more than 100 books covering numerous animal types—from mammals to insects to amphibians—as well as important issues surrounding the production and care of livestock.

This collection is updated continuously as additional books become available.
