15 French-language ebooks, packed with case studies for France's ECN medical exam - only available on OvidFrançais!

Available exclusively on OvidFrançais, Ovid's French-language search portal, the Cas Cliniques Collection includes 15 up-to-date editions, each with numerous clinical case studies, detailed clinical answers, and useful advice French medical students need to prepare for the all-important ECN exam, which is critical to their study and test success. Nowhere else can you find electronic versions of these hard-to-find exam prep books!

OvidFrançais offers instant time-saving access to core French-language information resources for students, instructors, researchers, and clinicians. Users can enter search queries in French - and expect full diacritic support - browse books and book table of contents, navigate between table of contents, chapters, and sections, print chapters, export results, enlarge images, and more.

Please note that the books in this collection are not available individually.
