Here's a compact package of 11 important psychiatry and psychology journals for the smaller institution.

The highly-regarded titles in this exclusive Ovid collection feature original, peer-reviewed research as well as syntheses of significant current research and findings.

Each one of these publications is highly cited. The collection is valuable for psychiatrists; psychologists; psychotherapists; medical and health-related specialists interested in the behavioral aspects of their field; residents; and students of psychology and medicine.

Key Features:

- Attractively priced for the smaller institution
- Easily accessible through Journals@Ovid, with our advanced searching features
- Thousands of links from PsycINFO, MEDLINE, and EMBAS
