A solid backfile of CAB’s Agricultural Economics Database (also on Ovid) - available as a one-time purchase for perpetual access on the Ovid platform.

Users will benefit from ready access to the informative and professionally selected abstracts drawn from several thousand key international sources published between 1959-1972. The information contained is crucial to government agencies, corporations, development consultants, professionals, and students involved with the socio-economic aspects of agriculture, forestry, and rural development, to name just a few.

In addition to agricultural economics, the database is a valuable source of information for other related topics such as: agricultural and regional policy, environmental economics, fisheries economics, food industry, marketing and distribution, international trade, and finance.
