Soil Science Database

Contains over 55 years of international research, this database represents the most targeted and in-depth source available for information on soils, water, fertilizer and land management.

Compiled by subject specialists at CABI Publishing, the Soil Science Database contains more than 1 million abstracts and citations, with 30,000 records added annually. Containing over 55 years of research from over 75 countries it provides an ideal source for professionals and students requiring an international perspective on the wealth of information available on soils.

Coverage includes:
- Soil science
- Soil management
- Crop management
- Fertilizers and amendments
- Agricultural meteorology
- Pollution
- Land reclamation
- Irrigation and drainage
- Plant nutrition
- Plant water relations
