The world’s leading database for petroleum exploration and production related scientific and technical information.

Petroleum Abstracts contains abstracts of the worldwide technical literature pertaining to petroleum exploration and production. Journals, patent gazettes, full-text patents, proceedings, standards, books, dissertations, and government reports are reviewed. An experienced staff of petroleum engineers and geoscientists selects, indexes, and abstracts information contained in each item.

TULSA contains more than 1.1 million entries, growing at the rate of about 40,000 entries per year. Information coverage published in the Petroleum Abstracts Bulletin is added to the database weekly.

Publisher: Petroleum Abstracts, Univ. of Tulsa, Oklahoma
Platform: Ovid
Product Type: DataBase
Speciality: General Engineering & Technology, Geology & Geosciences
Language: English
Frequency: Weekly
Coverage: 1965 - Present
Number of Records: 1.1 million
Records Added Annually: 40,000+
