With Biological Abstracts, you can easily discover the critical journal coverage you need to prepare research projects, grant proposals and follow trends in the life sciences. Explore relevant disciplines from botany to microbiology to pharmacology. Use specialized indexing to discover more accurate, context-sensitive results.

Find information in virtually every life sciences discipline, including biology, biochemistry, biotechnology, botany, pre-clinical and experimental medicine, pharmacology, zoology, agriculture, and veterinary science.

Over 250,000 records from journals worldwide are added annually to Biological Abstracts. Over 4,200 journals from 100 countries provide you with access to over 11.3 million records from 1926 to the present.

Use specialized indexing for more accurate retrieval, including taxonomic data and terms, enhanced MeSH disease terms, CAS registry numbers, Sequence Databank Numbers, and Major Concepts controlled vocabulary back to 1969.

Publisher: Thomson Scientific, Inc.
Platform: Ovid
Product Type: Database
Speciality:
- Animal Sciences
- Aquatic Sciences
- Biochemistry & Biophysics
- Biodiversity Conservation
- Biology
- Biomedical Engineering
- Biotechnology
- Cell Biology
- Development Biology
- Earth & Geological Sciences
- General Medicine
- Genetics & Genomics
- Microbiology
- Molecular Biology
- Pharmacology

Language: English
Frequency: Quarterly, 6 Times a Year, Bi-Monthly
Coverage: 1926 - Present
Number of Records: 11.3 million
