Agricultural Economics Database

Provides complete references and abstracts to more than fifty-five years of international literature covering all relevant aspects of the rural economy in the applied life sciences field.

Users benefit from ready access to informative and professionally selected abstracts drawn from several thousand key sources worldwide. The information contained is crucial to government agencies, corporations, development consultants, professionals, and students involved with the socio-economic aspects of agriculture, forestry, and rural development, to name just a few.

In addition to agricultural economics, Agricultural Economics Database is a valuable source of information for other related topics such as: agricultural and regional policy, environmental economics, fisheries economics, food industry, marketing and distribution, international trade, and finance.
