The Journal of Public Health Management & Practice, a bi-monthly peer-reviewed publication guided by a multidisciplinary editorial board of administrators, practitioners and scientists, publishes articles which focus on evidence based public health practice and research.

The Journal of Public Health Management & Practice publishes in a wide range of population health topics including research to practice; emergency preparedness; bioterrorism; infectious disease surveillance; environmental health; community health assessment, chronic disease prevention and health promotion, and academic-practice linkages.

Recognized as the leading practice based public health journal, the Journal of Public Health Management & Practice has recently published focus issues defining the public health workforce, performance management and bridging the research to practice gap.
