Published on behalf of the American Institute of Biological Sciences, this journal presents readers with timely and authoritative overviews of current research in biology, accompanied by essays and discussion sections on education, public policy, history, and the conceptual underpinnings of the biological sciences.

It includes articles about research findings and techniques, advances in biology education, professionally written feature articles about the latest frontiers in biology, discussions of professional issues, book reviews, news about AIBS, a policy column (Washington Watch), and an education column (Eye on Education). Roundtables, forums, and viewpoint articles offer the perspectives of opinion leaders and invite further commentary.

Occasional special sections in BioScience provide an in-depth look at important topics. Recent special sections have addressed ecological boundaries, protected areas, acid rain, science and public policy, the US Long Term Ecological Research network, and agricultural bioterrorism.

Impact Factor: 5.378
ISI JCR Ranking: 8/84 (BIOLOGY)
