- Research articles highlighting the latest in clinically relevant basic science of musculoskeletal diseases and their treatments.
- Monthly "Symposia" devoted to a single topic offering the generalist reader an overview of a field, but providing the specialist current in-depth information.
- Regular "Proceedings" issues containing the best research from the most important meetings in the speciality, including The Hip Society, The Knee Society, The Musculoskeletal Tumour Society and The Musculoskeletal Infection Society.
- Monthly commentaries, features, and interviews that provide context on the discoveries published in each issue, insight into issues affecting orthopaedic practice, and the opportunity to go "behind the scenes" with the authors whose work is affecting how patients get treated and how science gets done.
