Journal of General Physiology

Publishes original work that elucidates basic biological, chemical, or physical mechanisms of broad physiological significance.

The journal's main emphasis is on physiological questions at the molecular and cellular level.

The journal also publishes articles that strive to understand physiological function through innovative model simulations.

- **Impact Factor**: 3.68
- **ISI JCR Ranking**: 15/83 (PHYSIOLOGY)
- **Author/Editor**: Gordon, Sharona
- **Publisher**: Rockefeller University Press
- **ISSN**: 0022-1295
- **Platform**: Ovid
- **Product Type**: Journal
- **Speciality**: General Medicine, Physiology
- **Language**: English
- **Frequency**: Monthly
