Adverse Drug Reaction Bulletin

Provides comprehensive coverage in the field of adverse drug reactions. Each bimonthly issue contains an invited article on a topic of current interest, dealing with specific conditions from drug-induced lung disorders to drug-induced sexual dysfunction, or types of drugs from lipid-lowering agents to poisons antidotes.

Many of the articles published in this journal are Invited Reviews which have been specifically commissioned by the Editor from authors expected to have special knowledge of the subject under review. Offered reviews are welcomed, but it is essential that intending authors contact the Editor before submitting a manuscript, to confirm the appropriateness of the topic and to ensure that a similar article is not already in preparation. Offered articles will be subjected to peer review.

Impact Factor: 0
Author/Editor: Ferner, Robin E.
