Melanoma Research is a journal for basic, translational and clinical research in melanoma.

Melanoma Research is a well established international forum for the dissemination of new findings relating to melanoma. The aim of the journal is to promote the level of informational exchange between those engaged in the field.

Melanoma Research aims to encourage an informed and balanced view of experimental and clinical research and extend and stimulate communication and exchange of knowledge between investigators with differing areas of expertise. This will foster the development of translational research.

Melanoma Research seeks to present a coherent and up-to-date account of all aspects of investigations pertinent to melanoma. Consequently the scope of the journal is broad, embracing the entire range of studies from fundamental and applied research in such subject areas as genetics, molecular biology, biochemistry, cell biology, photobiology, pathology, immunology, and advances in clinical oncology influencing the prevention, diagnosis and treatment of melanoma.

Impact Factor: 2.615
ISI JCR Ranking: 17/63 (DERMATOLOGY), 127/217 (ONCOLOGY), 60/128 (MEDICINE, RESEARCH & EXPERIMENTAL)
Author/Editor: Lejeune, FJ; Storkus, WJ
Publisher: Lippincott Williams & Wilkins (LWW)
ISSN: 0960-8931
Platform: OvidMD, Ovid
Product Type: Journal
Speciality: Cell Biology, Dermatology, Oncology
Language: English
Frequency: Bi-Monthly
Coverage: Vol 10 #4 (2000) - Present
PDF Coverage: Vol 10 #4 (2000) - Present
Archives: Melanoma Research - Comprehensive Archive to 2012 Vol 1(1991) to Vol 23(2013)
Included In: Lippincott Williams & Wilkins Comprehensive Archive Bridge Collection 2017-2018
Lippincott Williams & Wilkins Comprehensive Archive Collection
Lippincott Williams & Wilkins Oncology Journal Collection 2016
Ovid®
