Current Opinion in Organ Transplantation

An indispensable resource featuring key, up-to-date and important advances in the field from around the world

Led by renowned guest editors for each section, every bimonthly issue delivers a fresh insight into topics such as stem cell transplantation, immunosuppression, tolerance induction and organ preservation and procurement. With 18 sections in total, the journal provides a convenient and thorough review of the field and will be of interest to researchers, surgeons and other healthcare professionals alike. As an added benefit, all review articles are supplemented with a fully annotated References and Recommended Reading section highlighting the most current and important papers in organ transplantation.
