British Medical Bulletin

Rely on Ovid as the trusted solution that transforms research into results

The British Medical Bulletin, a British Council publication, is a source for expert reviews on selected health topics for general physicians, residents (and other junior doctors), as well as medical students in both developed and developing countries. Aimed at the non-specialist, and guest edited and written by leading experts, the prestigious quarterly publication presents authoritative, unbiased and concise reviews of the current state of knowledge on important topics. Its key aims are to provide interpretations of significant new developments in medicine and to assist practitioners in incorporating not just evidence but also new conceptual ways of thinking into their practice.

Impact Factor	3.356
