Implant Dentistry, the official journal of the International Congress of Oral Implantologists, is an interdisciplinary forum for general practitioners, specialists, educators, and researchers.

Implant Dentistry publishes relevant clinical, educational, and research articles that document current concepts of oral implantology in sections on biomaterials, clinical reports, oral and maxillofacial surgery, oral pathology, periodontics, prosthodontics, and research. The journal includes guest editorials, letters to the editor, book reviews, abstracts of current literature, and news of sponsoring societies.

Implant Dentistry also provides up-to-date information and announcements regarding professional, educational, and legislative issues which impact on oral implantology. An outstanding editorial council, section editors, and reviewers ensure the quality of the journal’s contents. An objective of Implant Dentistry is to enhance the relationship of private practice, education, and research to advance oral implantology for the ultimate benefit of the patient.
