

Books@Ovid

Ovid

High-Quality, Current Editions in a Range of Scholarly Disciplines

- Choose any selection of books you want in a variety of scientific, medical, healthcare, and academic subject areas
- Offer quick, easy access to resources from Lippincott Williams & Wilkins, Oxford University Press, McGraw-Hill, Springer Science+Business Media, and other major publishers
- Take advantage of OvidSP's powerful search functionality, time-saving workflow tools, and intuitive interface
- Easily integrate Books@Ovid resources with your own institutional electronic book, journal, and database holdings
- Choose a convenient non-subscription pricing option for selected titles
- Select single titles a la carte or cost-effective, convenient collections

Book@Ovid offers a growing list of more than 1,500 current, online textbook editions from the world's most prestigious scholarly publishers, including one of the largest selections of core clinical ebooks.

More and more, researchers recognize the benefits of electronic books. Our ebook solution, Books@Ovid, delivers flexible access options—from subscription to purchase—plus robust search, browse, and integration options to deliver the best user experience to quickly and easily find important answers to critical questions.

Why Books@Ovid

- Natural language searching that generates relevance-ranked results
- Simultaneous searching of books, journals, and databases
- Seamless linking to full-text journals and databases, and even resources outside of the Ovid environment
- Flexible search and browse options: Quick Search for fast results; browse by title; browse by subject; or navigate a single, expandable table of contents
- Time-saving workflow tools: inline abstracts, search results annotations, flexible search results sorting, and more
- Downloadable MARC Records for any book for your OPAC
- Ovid Jumpstarts: hyperlinks to chapters, topics, tables of contents, and more
- Search limiting by one title or multiple titles

See page 2 for a list of subjects in medical and scientific specialty areas, as well as core books available for purchase or subscription on Books@Ovid.

Think Fast, Search Faster with OvidSP

Designed for speed, simplicity, and precision, OvidSP incorporates new time-saving workflow tools, an intuitive interface, and sophisticated search technology for a simpler, more streamlined search experience.

- Choose from multiple search modes, including Basic Search, with natural language processing, Advanced Ovid Search, and more
- Take advantage of journal eTOCS and AutoAlerts delivered via RSS, search results annotations, flexible search results sorting, inline abstracts, and more
- Use everyday natural language to search seamlessly and retrieve relevance-ranked results
- Search simultaneously across databases, journals, and books

Core Titles Include:

AJCC Cancer Staging Atlas (Springer Science + Business Media)

Hundreds of illustrations provide detailed and thorough anatomic depictions that clarify critical structures and allow the reader to instantly visualize the progressive extent of malignant disease.

Cancer: Principles and Practice of Oncology (Lippincott Williams & Wilkins)

Led by editor-in-chief Vincent DeVita, recognized the world over for cancer research, this "ultimate authority on cancer" reflects the latest breakthroughs in molecular biology, cancer prevention, and multimodality treatment of every cancer type.

Harrison's Principles of Medicine (McGraw-Hill)

Your first choice for state-of-the-art coverage of more than 4,700 diseases and disorders in the areas of oncology, cardiology, and more. Readers can quickly make accurate clinical decisions at the point of care.

Hurst's The Heart (McGraw-Hill)

World-renowned cardiologist Valentin Fuster has assembled an international group of thought leaders in the latest revision of this must-have textbook. Whether the topic is coronary bypass surgery, angina, or advances in minimally invasive treatment, you'll find the latest therapeutic strategies and supporting evidence-based data.

Lippincott Manual of Nursing Practice (Lippincott Williams & Wilkins)

A classic nursing reference for essential patient assessment and treatment guidelines, including 150 step-by-step procedures.

Minimally Invasive Spine Surgery (Springer Science + Business Media)

The didactic presentation of surgical steps makes the reader familiar with all types of new minimally invasive techniques in clinical use or still in ongoing clinical trials such as minimally invasive spine arthroplasty.

Oxford Handbook of Memory (Oxford University Press)

Written by the world's leading memory scientists, it brings together facts and theories of cognitive psychology; memory development in childhood and old age; memory impairment in brain injury and disease; and more.
