

Ovid

## Inspec® and Inspec® Archive - the Leading Bibliographic Sources for Current and Historical Research in Engineering, Technology, and Physics

- Help users conduct competitive intelligence, technological forecasting, and patent-related searching
- Offer users quick, easy access to the scholarly literature in electronics; computer science; physics; electrical, control, production, and mechanical engineering; and related disciplines
- Easily integrate Inspec with Ovid and non-Ovid bibliographic and full-text content
- Combine the current file and the Inspec Archive for simultaneous access to a seamless chronology of historical and current literature
- Take advantage of OvidSP's powerful search functionality, time-saving workflow tools, and intuitive interface

Produced by the **Institution of Engineering & Technology (IET)**, one of the world's largest professional engineering and technology societies, Inspec is the most comprehensive index to scholarly and professional literature in a range of subjects, including electronics; computer science; physics; electrical, computing, control, and mechanical engineering; and production and manufacturing. International in scope, Inspec features:

- More than 11 million records—containing abstracts, from over 1,000 publishers and dating back to 1969; updated weekly (Inspec Archive spans 1898-1968); records now contain author name, email, institution, and IPC code
- International Patent Classification (IPC) codes, ideal when searching non-patent literature; applies to roughly 75% of all records dating back to 1969
- Coverage from over 5,000 scientific and technical journals, 2,700 conference proceedings, as well as books, book chapters, reports, and dissertations
- Controlled subject indexing—by chemical name, language, numerical data, and more—developed by subject matter experts
- Powerful Thesaurus allows for use of subject headings, key phrase identifiers, classification codes for physics, electronics, electrical engineering, biomedical engineering, and others, as well as treatment codes

### Why Inspec on Ovid?

- A range of OvidSP searching options, including natural language, controlled vocabulary, and multi-field searching
- Sophisticated linking to full-text literature from Ovid and non-Ovid sources
- Multi-file searching with as many other Ovid-subscribed databases as you like, with automatic de-duping
- Inline abstracts, search results annotations, flexible search results sorting, and other tools
- Saved searches delivered via RSS feed or AutoAlert email
- Inspec-specific limits for precise searching
- Fast access to consistent and precise search results

*See page 2 for more information on Inspec Archive.*

## OvidSP

Transforming Research into Results.

OvidSP is your complete online research solution, offering a single online destination where you can search, discover, and manage the critical information you need to streamline your research productivity and your work.

- Work the way you want to work with a variety of search modes and customizable work productivity and content alerting tools
- Save and manage critical research findings and documents in a dedicated work area—**My Projects**
- Extend your Ovid research experience beyond OvidSP with the **Ovid Toolbar**
- Search all Ovid resources—books, journals, and databases—simultaneously with just one query

### Ovid Worldwide Headquarters

333 7th Avenue  
New York, NY 10001  
(646) 674-6300  
(800) 343-0064  
Email: [sales@ovid.com](mailto:sales@ovid.com)

Additional sales offices are located in the following cities and countries:

Alphen aan den Rijn, The Netherlands  
Beijing, China  
Berlin, Germany  
Bologna, Italy  
Hong Kong  
Kuala Lumpur, Malaysia  
London, UK  
Madrid, Spain  
New Delhi, India  
Norwood, MA, USA  
Paris, France  
Sandy, UT, USA  
Sofia, Bulgaria  
Stockholm, Sweden  
Sydney, Australia  
Tokyo, Japan  
Villa Alemana, Chile  
Warsaw, Poland

For complete contact and location information, visit [www.ovid.com/contact](http://www.ovid.com/contact)

### Subjects and specialties covered:

- Biomedical engineering
- Biophysics
- Biotechnology
- Communications
- Computer science
- Control engineering
- Electrical engineering
- Electronics
- Energy Research
- Geophysics
- Information technology
- Materials science
- Nanotechnology
- Nuclear engineering
- Oceanography
- Physics
- Production and Mechanical Engineering

### Who uses Inspec?

Whether you're in the scientific, engineering, medical, or academic community, Inspec is a valuable resource for:

- Easy access to research not yet published; Inspec has over 2700 conference proceedings, and 29% of its documents are conference papers and proceedings
- Research in electronics and electrical engineering
- R & D at biotechnology, medical device, telecommunication or large electrical companies
- Patent examination and application preparation
- Competitive intelligence and technological forecasting
- Current awareness and new product information research

### World-Wide Journal Focus

Inspec covers over 5,000 journals published all over the world. Below are the top 10 source countries:

- USA (over 1,000)
- UK (roughly 900)
- Netherlands (over 350)
- China (over 300)
- Switzerland (roughly 300)
- Germany (over 200)
- Japan (over 150)
- Russia (over 100)
- India (roughly 70)
- France (roughly 60)

### Inspec® Archive

Get simultaneous access to current and historical literature with this comprehensive source of records drawn from the entire collection of Science Abstracts journals—which pre-date the electronic Inspec database—published between 1898 and 1968.

The Archive is increasingly being used by contemporary researchers because it is rich in information relevant to some of today's 'hot' topics including frugal innovation, regenerative braking, energy harvesting and wireless and power transfer – to name just a few areas!

- Roughly 873,700 English-language records drawn from 176 volumes of the printed journals—over 140,000 pages!
- Topics covered include all aspects of physics, electrical and electronic engineering, and control engineering
- Indexed against the current Inspec file's Thesaurus terms and classification codes
- Records include extended abstracts, tables, diagrams, and graphics to support scientific examination

Contact your Ovid Account Representative or [support@ovid.com](mailto:support@ovid.com) for more information about subscribing to Inspec on Ovid.

Count on Ovid's award-winning technical support team 24/7/365!
