**OvidSP is the only platform that uses the American Psychological Association's *Thesaurus of Psychological Index Terms* to help expand your search query to include related terms and synonyms.**

OvidSP offers the full suite of award-winning psychology resources from the **American Psychology Association (APA)**, one of the world's leading authorities in general and clinical psychology. PsycINFO®, PsycCRITIQUES®, PsycBOOKS®, PsycARTICLES®, and PsycEXTRA® offer bibliographic records, full-text, and non-scholarly 'gray' literature and cover the entire spectrum of therapeutic areas and topics, from addiction and stress to child psychology.

With OvidSP you can search all APA products using the most robust lexicon available today—to quickly generate a comprehensive list of relevant results to do your research and work. How? With the unique Natural Language Processing (NLP) of OvidSP's Basic Search mode.

Enter a simple search query in everyday language, click the **Include Related Terms** feature and OvidSP's proprietary psychology lexicon will automatically:

- **Increase search recall over exact word matches**
- **Expand search terms on the original search query**
- **Ensure that search results include synonymous concepts, not just matching words**
- **Include plural forms in term expansion**
- **Verify spelling**

**You'll instantly generate a comprehensive list of relevant results!**
