

Archives from CABI

Ovid

Backfiles from 1913-1972 in various agriculture and animal science related disciplines

- Quickly and easily build your institution's offerings in agriculture, veterinary science, plant science, food science, and environmental science
- Take advantage of OvidSP's powerful search tools and time-saving workflow features
- Fill gaps in your collection and free up shelf space with searchable electronic backfiles
- Reduce storage and Inter-Library Loan costs and staff time
- Make a one-time convenient purchase and offer site-wide access

CABI is one of the world's leading sources of scholarly literature in agriculture, development, and food and environmental sciences.

With over 30 years of research from over 75 countries, CABI subject specialists have compiled an ideal source for professionals and students requiring an international perspective.

These databases contain several hundred thousand relevant abstracts and citations, with more records added annually – making available a very comprehensive set of archives on agriculture, animal science and related subject areas.

Archives from CABI - available on OvidSP

- CAB Abstracts
- CAB Reviews
- Agricultural Economics
- Animal Production
- Animal Science
- Crop Science
- Global Health
- Horticulture Science
- Parasitology
- Plant Genetics and Breeding
- Plant Protection
- Soil Science
- Veterinary Science

See page 2 for details on all these CAB archives.

OvidSP

Transforming Research into Results.

OvidSP is your complete online research solution, offering a single online destination where you can search, discover, and manage the critical information you need to streamline your research productivity and your work.

- Work the way you want to work with a variety of search modes and customizable work productivity and content alerting tools
- Save and manage critical research findings and documents in a dedicated work area—**My Projects**
- Extend your Ovid research experience beyond OvidSP with the **Ovid Toolbar**
- Search all Ovid resources—books, journals, and databases—simultaneously with just one query

Ovid Worldwide Headquarters

333 7th Avenue
New York, NY 10001

Uncover the depth of archive content available from CABI

CAB Abstracts Archive

Covering the literature from 1910 to 1972, this archive, available electronically contains nearly 2 million records on every aspect of agricultural science, veterinary medicine, nutrition and natural resources.

CAB Reviews Archive

Over 3,000 reviews published by CABI between 1973 and 2003 available as a one-time purchase, complete with high-quality review articles to complement the information in its abstract journals and bibliographic databases.

Agricultural Economics Archive

Provides complete references and abstracts to more than 25 years of international literature covering all relevant topics including agricultural and regional policy, environmental economics, fisheries economics, food industry, international trade, and finance. The information contained is crucial to professionals and students involved with the socio-economic aspects of agriculture, forestry, and rural development.

Animal Science Archive

A cost-effective combination of CABI's Animal Production Database and Veterinary Science Database.

Animal Production Archive

Containing over 30 years of research from over 75 countries this database provides an ideal source of information on animal breeding, animal nutrition, dairy science, and dairy technology for animal scientists, researchers in the agricultural life sciences and veterinary specialists.

Veterinary Science Archive

Covering all aspects of veterinary medicine and anthropod, helminth, protozoal and fungal diseases of domestic and wild animals, this database provides a complete resource of backfile with attention is given to farm animals, commercially important wild fish, zoo animals, wild animals, pets, and shellfish.

Crop Science Archive

Access to over 30 years of international scientific information relating to field crops, fodder crops, and grasslands and covers such diverse subject areas as: agronomy, botany, physiology, biochemistry, field production, farming systems, and more.

Global Health Archive

Derived from over 3500 journals, plus reports, books and conferences, Global Health is the the only specialist bibliographic, abstracting and indexing database dedicated to international coverage of public health research and practice - containing everything from proceedings, patents, theses, electronic only publications and other difficult-to-obtain sources.

Horticulture Science Archive

As fully searchable abstracts database of published research on horticultural crops, from genetic resources to gene expression, and propagation to storage, this database delivers all the highly-targeted, searchable summaries of key journal articles, reports, conferences and books on horticultural science.

Parasitology Archive

Covering parasitology in its broadest sense, this database encompasses helminthology, protozoology, medical and veterinary entomology and mycology and contains bibliographic citations and abstracts from the scientific literature on all aspects of the biology and control of parasites and vector-borne diseases of humans and domestic and wild animals.

Plant Genetics and Breeding Archive

This database provides access to international scientific research relating to genetic resources, biotechnology, taxonomy, plant breeding, intellectual property rights and cytogenetics for all cultivated crops, forest trees, ornamentals, and edible fungi.

Plant Protection Archive

For comprehensive information regarding plant protection, this database offers backfiles relating to weeds, pathogens and pests (insects, mites, slugs, snails and vertebrates) of crops, forest trees and plant products, and their control. All kinds of pesticides used in this context, their synthesis, chemistry, formulations, safety and non-target effects are also included.

Soil Science Archive

This database represents the most targeted and in-depth source available for information on soils, water, fertilizer and land management covering such diverse subject areas as soil science, agricultural meteorology, irrigation, soil and water management, fertilizers and crop plant/water relationships.
