Based in Australia, the Joanna Briggs Institute (JBI)—one of the world's leading evidence-based practice organizations—has developed an evidence-based practice model that is considered a benchmark in the healthcare industry.

Using the model, healthcare professionals assess the world's best primary literature, applying a strict methodology to evaluate for relevancy, accuracy, and scientific credibility; synthesize and transfer the evidence; then use it to provide the best possible patient care.

The first book of the series seeks to examine the translational research process in relation to the JBI Model of Evidence Based Healthcare – clarifying how the three translation gaps identified in the text and the elements of the JBI Model complement each other in modeling the relationship between the translation science cycle and the pragmatic evidence-based healthcare cycle.
