

Add your preferred database as a “Search Provider”

In order to benefit from this feature you will need to use:

- Internet Explorer 7 or later
- Firefox 3.X or later

To add a Search Provider on your browser, click on the following link and select your preferred database from the list:

http://demo.ovid.com/demo/ovidsptools/browser_search.htm

*Please note the “Search Providers” use the OvidSP Basic Search (**natural language**) mode. If you prefer to use the Advanced Search (**syntax**) mode, please contact support@ovid.com to obtain a different link for your preferred Search Provider(s).*

After adding the Search provider you will be able to search directly in the database from your browser. If your preferred database is not listed, or if you want to search a combination of databases please send a request to support@ovid.com.
